Kyle O'Brien

Full-Stack Developer

Cincinnati, OH | hello@kyleobrien.design | www.kyleobrien.design | github.com/SinisterChef | linkedin.com/in/kobdev/

Summary

Full-Stack Web Developer with 15 years of experience building performant, accessible, and engaging websites. Skilled in modern web frameworks, CMS platforms, and tech stacks including React, Blazor, ASP.NET Core, Drupal, WordPress. Strong background in analytics-driven UX design, WCAG-compliant accessibility, API integrations, and scalable front-end architecture.

Experience

MotorSports DataWorks — Team Lead Systems Engineer, Contract | 2026

- Led development across the International Hot Rod Association ASP.NET Core Blazor digital ecosystem, assigning and coordinating work for team members while actively building public ticketing, race results, admin event operations, and racer-facing registration portals powered by a centralized API.
- Built sport-specific licensing and membership workflows that captured racer identity, medical, team, vehicle, entitlement, and eligibility data through custom multi-step registration wizards.
- Implemented event registration validation systems to confirm racer memberships, licenses, medical forms, and sport-specific entitlements before allowing event entry.
- Created custom points, standings, and leaderboard systems for multiple racing disciplines, each requiring unique scoring rules, class logic, and season-based calculations.

Magnetic Mobile — Front-End Developer | 2024 – 2025

- Delivered front-end development in a Scrum environment, contributing to enterprise-grade codebases for national brands including 7-Eleven, Lowes, Speedway, Champion Windows, and Salon Lofts.
- Migrated Speedway.com from a .NET Core codebase to a headless CMS with a React front-end, designing CMS content models, integrating API payloads, and building modular React components.
- I rebuilt the entire front-end of speedway.com/locations with React, ContentStack and Google Maps API.
- Developed custom landing pages, site sections, banners, and Google Maps integrations for Championwindow.com using .NET Core. Partnered with clients and designers to deliver promotional content. Managed database updates via SQL Server Management Studio and deployed scripts through Visual Studio across test and production environments.

Wright State University — Web Developer & UX Designer | 2013 – 2024

- Collaborated with Marketing, IT, and clients to deliver multi-platform web and ad campaigns supporting multi-million-dollar initiatives.
- Led a full homepage redesign for wright.edu, focused on prospective students, improving navigation and engagement. Analyzed 5 years of analytics, built personas, and produced wireframes & prototypes — resulting in 7M+ annual pageviews.
- Designed and developed student enrollment portals, wright.edu/apply, and integrated with Slate CRM, improving application completion rates through improved UX and cohesive branding.
- Managed the university's visual identity across 70+ digital badge illustrations, TikTok/Instagram campaigns (2M+ annual views), murals, and billboards.
